COPYING OF ARTICLES

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The per-copy fee for each article appears after the dollar sign, and is to be paid through the Copyright Center, Inc. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests, or other inquiries, should be addressed to the publisher.

THE JOURNAL OF
Pathology

Published in association with the
Pathological Society of Great Britain and Ireland

Editor-in-Chief

Professor D. H. Wright
Department of Pathology, University of Southampton, South Laboratory/Pathology Block, Southampton General Hospital, Tremona Road, Southampton SO9 4XY, UK

Editors

Dr A. G. MacIver
Department of Pathology, Southmead General Hospital, Westbury-on-Trym, Bristol BS10 5NB, UK

Professor F. Walker
Department of Pathology, University Medical Buildings, Foresterhill, Aberdeen AB9 2ZD, UK

Aims and Scope

The Journal of Pathology is a journal of the Pathological Society of Great Britain and Ireland. From January 1984, it has incorporated the other affiliated journal, *Diagnostic Histopathology*. The new group of Editors intend that the journal shall reflect the interests of the members of the Society. This will be no easy task since they cover the whole range of experimental and diagnostic histopathology.

High quality papers, written in English and dealing with descriptive histopathology will be welcome. Papers dealing with new techniques and those that elucidate the mechanisms underlying disease processes and histopathological appearance will be particularly encouraged. Single case reports will be accepted only when they are of exceptional interest with important new information and which contain a full, but concise, review of the literature. Good photo-micrographs are of particular value and interest to histopathologists and emphasis will be placed on the quality of the illustrations.

Original articles in the field of experimental pathology, relevant to human disease, will be welcome. Review articles dealing with general and experimental pathology, as well as diagnostic histopathology, will be solicited. Unsolicited reviews will also be accepted if they are clearly written and topical. Editorials, a letter column and reviews of recently published books will form regular features of the Journal. Meetings abstracts of the Pathological Society of Great Britain and Ireland will be published as they become available and the annual CL Oakley Lecture will continue to be included. Symposia proceedings may be published if the Editors consider them appropriate and relevant. The Editors wish to maintain the minimum delay between manuscript submission, decision and publication, and authors are therefore requested to follow the instructions for manuscript preparation as set out in the Notes for Contributors which are printed on the inside back cover.

JOURNAL OF PATHOLOGY

Issue No. 1 SEPTEMBER 1986

Editorial, D. H. WRIGHT 1

Invited Review

Class II Major Histocompatability Complex and Organ Specific Autoimmunity in Man, A. K. FOULIS 5

Original Papers

Changes at the Glomerular Tip: A Feature of Membranous Nephropathy and other Disorders Associated with Proteinuria, A. J. HOWIE 13

Contrasting *in vitro* Effects of Retinol and Mononuclear Cell Factor on Young and Old Human Cartilage, O. HUBER-BRUNING, B. WILBRINK, J. E. VERNOOIJ, J. W. J. BIJLSMA, W. DEN OTTER and J. HUBER 21

Desmin-containing Stellate Cells in Rat Liver; Distribution in Normal Animals and Response to Experimental Acute Liver Injury, A. D. BURT, J. L. ROBERTSON, J. HEIR and R. N. M. MACSWEEN 29

DNA Flow Cytometry of Human Breast Carcinomas and its Relationship to Transferrin and Epidermal Growth Factor Receptors, R. A. WALKER and R. S. CAMPLEJOHN . . 37

Stromal Changes in Early Invasive and Non-invasive Breast Carcinoma: An Ultrastructural Study, S. O. TAMIMI and A. AHMED 43

Cluster Differentiation Antigen Expression, Proliferative Activity and Clinical Stage in Centroblastic Centrocytic Lymphomas, J. M. S. WILLIAMSON, I. GRIGOR, M. E. F. SMITH, C. S. HOLGATE, P. QUIRKE, C. C. BIRD, D. L. ALISON and J. A. CHILD . . . 51

Immunohistological Study in Chordomas, J.-M. COINDRE, J. RIVEL, M. TROJANI, I. DE MASCAREL and A. DE MASCAREL 61

Technical Method

An Autoradiographic Technique for *En-Face* Preparations of Aortic Endothelium, M. J. ZIMMERMAN and J. K. MCGEACHIE 65

Letters to the Editor

Low Molecular Weight Cytokeratin Proteins in Cervical Neoplasia, M. WELLS, L. J. R. BROWN and P. JACKSON 69

Reply to Letter to the Editor: Low Molecular Weight Cytokeratin Proteins in Cervical Neoplasia: L. G. BOBROW, C. A. MAKIN, S. LAW and W. F. BODMER 70
